## SUMMARY

Full Stack Engineer with 3+ years shipping end-to-end features across Node.js backends and React/Next.js frontends for fintech and high-traffic consumer platforms. Strong in REST/GraphQL API design, PostgreSQL/MongoDB modeling, and production delivery on AWS with Docker and CI/CD.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, SQL

**Backend:** Node.js, Express.js, GraphQL, REST, WebSockets, JWT/OAuth, Webhooks

**Frontend:** React, Next.js, Tailwind CSS

**Data:** PostgreSQL, MongoDB, Redis, Supabase (RLS)

**Cloud & DevOps:** AWS (EC2, S3, CloudFront), Docker, GitHub Actions, Vercel

**Practices:** CI/CD, On-call, Monitoring, Jest, Cypress, Agile/Scrum, Git, Linux

## EXPERIENCE

### Full Stack Engineer

Oct 2024 – Present

*Greens Fintech Innovation Ltd*

*UAE (Remote)*

- Built and operated core backend services processing 20K+ transactions/day at 99.9% uptime across payment and lending workflows.
- Designed secure REST and GraphQL APIs for 4 internal teams and 3 banking partners, enforcing JWT, RBAC, and input validation for compliance.
- Cut deployment time from 25 min to 8 min via Docker + GitHub Actions CI/CD, enabling 5+ zero-downtime releases/week.
- Owned on-call; resolved 40+ incidents within SLA and reduced recurring incidents ~35% through root-cause fixes and alerting.

### Software Engineer (Backend & React)

Jun 2023 – Oct 2024

*Darul Solutions*

*Karachi, Pakistan*

- Reduced average API response time ~30% (320 ms → 215 ms) by profiling Node.js/Express endpoints and indexing slow PostgreSQL queries.
- Shipped 15+ full-stack features with Next.js and TypeScript across two-week agile sprints.
- Designed PostgreSQL/MongoDB data models supporting 100K+ registered users and multi-step workflows.
- Raised backend test coverage to 80% with Jest, cutting production bug reports ~40%.

### Full Stack Developer (Freelance)

Mar 2020 – May 2023

*Upwork*

*Remote*

- Delivered 20+ projects for 15+ international clients with a 100% job-success score, spanning API design, databases, and AWS deployment.

## PROJECTS

### BNPL Marketplace Integration Platform · Node.js, REST, PostgreSQL

- Engineered a multi-party Buy-Now-Pay-Later system unifying marketplace, banks, vendors, and users, handling \$500K+ monthly volume.
- Built role-based APIs with audit trails and reconciliation logic, cutting settlement discrepancies ~25%.

### Tamasha – Media Streaming Platform · React, Next.js

tamashaweb.com

- Built high-performance React/Next.js components serving 10K+ concurrent viewers; improved LCP ~35% under heavy traffic.

### Shadi Tayari – Matrimonial Platform · Next.js, Redis

shaditayari.pk

- Led backend; Next.js SSR + Redis caching reduced page load ~45% and database load ~30%.
